♦ Skin management System Hydro-Facial and Oxi-Facial

The new DermaMax | Hydrodermabrasion System is an innovative non-invasive skin management system designed to maintain the skin's youthful brightness, tautness and smoothness by combining modern anti-aging technologies with the infusion of hydrating and antioxidant substances that cleanse, nourish and moisturize the skin in one pleasant, risk-free treatment.

In just a few minutes per session, the DermaMax achieves a revitalizing, anti-aging effect through a simple and fast procedure that keeps the skin looking fresh, smooth and radiant for a very long time.

- Safe for all skin types, ages, and colors
- Can be combined with other skin treatments
- Does not require recovery time
- Does not cause scratching, bruising or irritation
- Does not cause pain or side effects

♦ Two advanced protocols tailored to your patients' needs

HYDRO-Facial

Reveals softer, glowing skin instantly

Ideal for those who are looking to deep cleanse their skin and restore its youthful glow, Hydro-Facial uses products with soothing, nourishing and hydrating properties that offer a wide range of benefits to achieve exceptional results:

- Remove dead cells from the epidermis, achieving a delicate polishing effect
- Soften the sebum contained in the pores to prepare them for extraction
- Nourish the skin, hydrating it and restoring its youthful tautness.

The abrasion produced by its modern applicator stimulates cell regeneration and repair, effectively reducing the signs of aging and sun damage. Additionally, the exfoliation and the infusion of active ingredients into the skin allows to nourish the tissues thanks to its antioxidant properties and cleanses the pores to extract impurities and black heads without causing discomfort.

OXI-Facial

Purifies and transforms the skin using the benefits of oxygen

This treatment creates the ideal conditions to nourish the skin and achieve an amazing transformation in just minutes. The DermaMax's specialized applicator produces vibrations when coming in contact with the skin. A gel that has been previously applied to the treatment area reacts to these vibrations, creating an oxygenating effect that helps purify the skin, remove impurities, and delicately exfoliate the epidermis to visibly improve its texture and appearance.

The use of multipolar RF also produces focalized heating without damaging the tissues and without causing pain, stimulating cells to produce more collagen and elastin which results in younger, tighter, more elastic skin.

By applying galvanic energy, the DermaMax increases the permeability of the skin's protective barrier, improving the absorption of products rich in nutrients and antioxidants that tighten and rejuvenate the skin without needles or pain.

A fabulous age management system for more beautiful, glowing skin

◆ Only 3 steps to younger, smoother, radiant skin

Cleanses

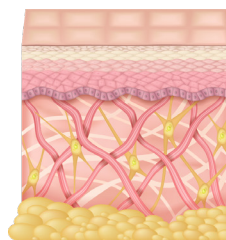

Removes impurities and excess sebum from pores, achieving a deep cleanse in seconds for an immediate transformation.

Exfoliates

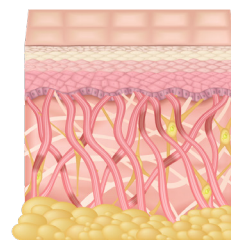

Removes dead skin cells from the epidermis, polishing it delicately to restore its tautness and glow.

Hydrates and Nourishes

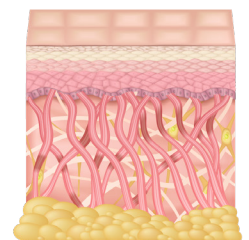

Infuses hydrating products rich in nutrients and antioxidants that rejuvenate, tighten and protect the skin, significantly improving its texture and appearance.

1 month later

2 months later

3 months later
The skin is more elastic and tense.

♦ Achieve an amazing anti-aging effect in only 30 minutes
with the DermaMax | Hydrodermabrasion System

- Increases collagen production
 - Improves skin tone and elasticity
 - Reduces the appearance of dark spots and scars
 - Restores the skin’s youthful glow and radiance
- Reduces fine lines and wrinkles
 - Minimizes large pores
 - Helps treat acne

Exfoliates and hydrates to
instantly create a more fresh,
youthful looking skin

♦ Its state-of-the-art technologies offer a comprehensive treatment to address multiple skin conditions quickly and effectively:

Hydrodermabrasion Applicator

Provides a deep skin cleanse, removes dead cells from the skin's outer layer, and removes excess sebum from pores to help reduce acne and achieve healthier looking skin.

Iontophoresis Applicator

This technique uses continuous, modulated current to facilitate the penetration of active ingredients into the skin, improving tone and elasticity without pain or discomfort.

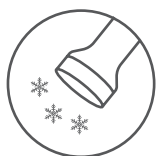

Multipolar RF Applicator

The radiofrequency energy heats up the deeper skin layers to stimulate the production of new collagen and elastin fibers, improving its firmness and elasticity and taking years off the face.

Ultrasound Applicator

The ultrasonic waves are applied to the treatment area to improve the absorption of active ingredients into the deeper tissues, maximizing their effect and achieving visible rejuvenating and firming results.

Cooling and Heating Applicator

Its cooling and heating system contracts and expands pores to improve the absorption of hydrating products that are rich in nutrients and antioxidants.

BOHR Applicator

Applies oxygen into the skin to achieve a deep cleanse and gently remove dead skin cells from the outer layer for beautiful, smoother skin.

Oxygen Applicator

The infusion of oxygen into the tissues activates blood circulation, revitalizing and rejuvenating the skin in a safe manner.
