LipoMax[®] RF

F A C E | B O D Y

Introducing the newest multiplatform aesthetic device whose powerful combination of non-invasive technologies offers the most advanced and effective face and body treatments in the market. Utilizing the proven properties of photoneumatic massage, radiofrequency and LED light, LipoMax offers remarkable results that are visible from the very first day and improve with every additional session.

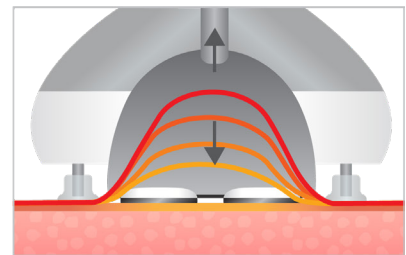

Its modern patented Superpulse technology offers maximum results by allowing to control the suction level and release. Furthermore, it facilitates a smooth sliding motion of the applicator on the skin to ensure patient comfort and increase treatment efficacy. In just a few sessions the LipoMax reduces the appearance of cellulite, reshapes the body and tightens the neck and eye area, achieving superior results in a completely safe manner.

Vacuum

Release Vacuum

Super Pulse Technology

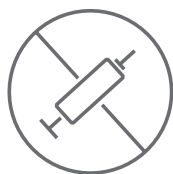

◆ Slims, tightens and lifts without painful procedures or side effects.

The LipoMax state-of-the-art technology offers a comprehensive full body treatment to achieve an amazing transformation safely and comfortably without the need for chemicals, injections or invasive surgeries. Its specialized applicators work on the tissues in a focalized manner to tone, lift the buttocks, reduce cellulite, and eliminate unwanted fat even in the most problematic body areas. Its facial applicator also lifts and tightens the face and neck, offering a fabulous anti-aging result by effectively treating the forehead and cheek area, the nasolabial folds and the jowls.

◆ Reduces between 2 and 8 cm in just 30 minutes per session.

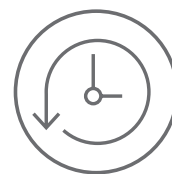

NO PAIN

NO SURGERY

NO SIDE
EFFECTS

NO RECOVERY
TIME

Achieve a slimmer body and younger looking skin in only 6 treatment sessions

Bipolar and Multipolar Radiofrequency Energy

LipoMax uses the proven properties of bipolar RF and multipolar RF to treat the different layers of the skin safely and effectively. Its specialized treatment head delivers energy into the deeper tissues which produces a controlled heating of the skin without damaging the epidermis and the surrounding tissues, instantly improving its texture and appearance. The heat generated also stimulates the fibroblastic cells to produce more collagen fibers, improving the skin's youthful tone and elasticity for a natural lifting effect. Furthermore, the thermal response smoothens the appearance of cellulite by reducing liquid and toxin retention which is one of the factors that causes the appearance of lumps and dents in areas such as the thighs, buttocks and abdomen.

The use of radiofrequency safely activates the fat elimination process by causing the rupture of the adipose cells. The cell content breaks down and is later eliminated by the body through the urinary and lymphatic system, instantly reducing the volume of the treated area.

Photopneumatic Massage with Superpulse Technology

LipoMax uses an advanced patented technique that maximizes the properties of the subdermal photopneumatic vacuum massage, remodeling the facial contour, reshaping the body and effectively treating the causes of unwanted cellulite. The pulsating suction applied by the treatment head stimulates the lymphatic drainage, increases blood circulation, relaxes the tissue, and provides a fascia massage to help diminish the skin's orange peel appearance and stimulate fat elimination.

LED Light Energy

Its modern applicator delivers visible light into the skin at different wavelengths, acting at a cellular level to achieve the desired therapeutic response. The energy penetrates deep into the tissues and activates the repair and regeneration mechanisms to significantly improve the skin's appearance and texture through a fast and pleasant procedure.

LED light at 630nm: stimulates the fibroblasts to create new collagen fibers to replace the old ones, repairing the damaged tissues and restoring the skin's youthful tone, smoothness and firmness.

LED light at 430nm: provides an effective acne treatment thanks to its purifying and antibacterial properties for beautiful, smoother, healthier looking skin.

♦ Innovative patented technology for results that you can see and feel.

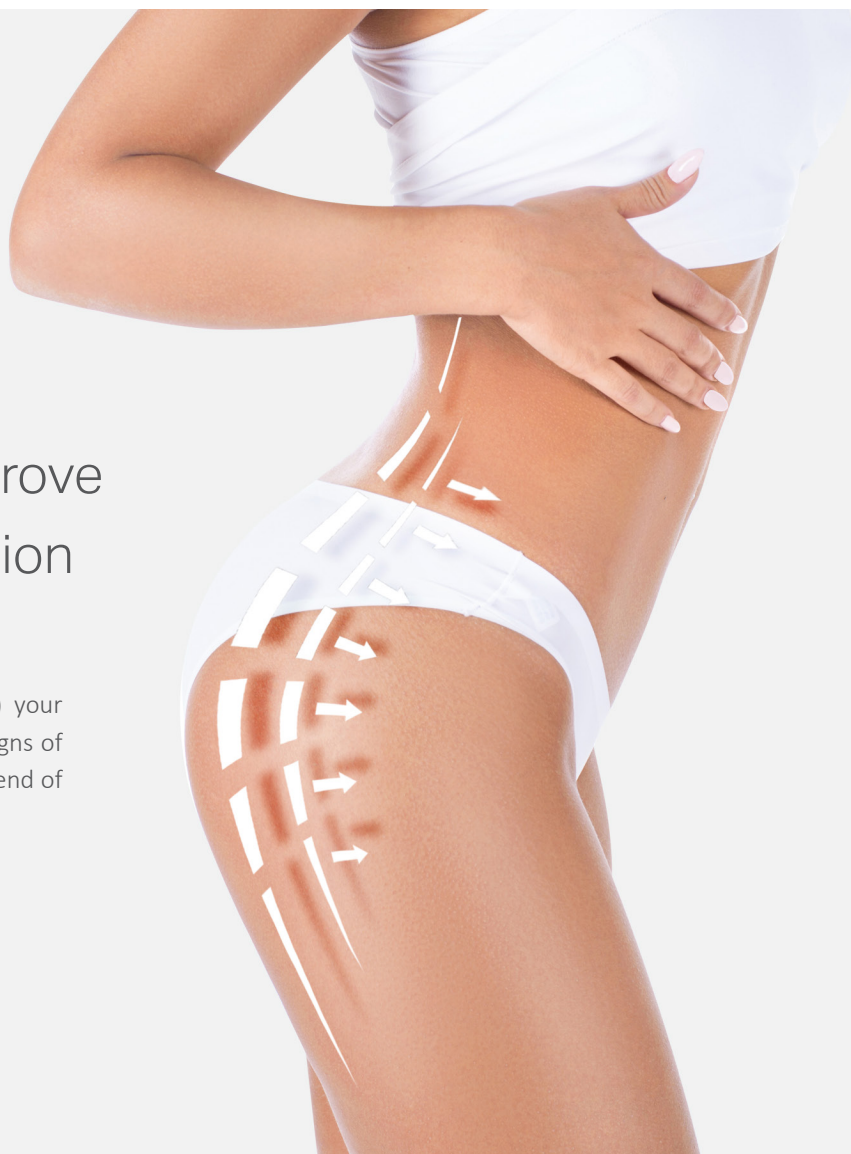

Its specialized applicator delivers 15 pulses per second, maximizing the effect of the photopneumatic vacuum massage on the skin for immediate firming, body shaping and lifting results. The specialist also has the ability to control the intensity as well as the application and release of the vacuum according to the client's specific needs to achieve the desired outcome. Furthermore, this advanced technology allows a free, smooth sliding motion of the applicator over the treatment area to ensure a comfortable, painless procedure.

♦ 3 advanced pulse modes.

Continuous Pulse Mode	Stimulates lymphatic drainage, triggers fat elimination and activates blood circulation.
Regular Pulse Mode	Controls the vacuum level as well as its application and release to achieve optimal results.
Super Pulse Mode	Applies a soft yet powerful vibration to optimize the effect of the treatment in a comfortable and safe manner.

Incredible results that improve with every treatment session

In only six 30- minute sessions (2 sessions per week) your clients will notice how their body slims down and the signs of aging diminish, achieving an extraordinary result by the end of the treatment series.

♦ Achieve an amazing transformation, fast and risk free.

Slims and reshapes the figure instantly:

- Visibly reduces the appearance of cellulite.
- Reduces fat deposits in areas such as the thighs, buttocks, abdomen and waistline.
- Shapes and remodels the body contour.
- Restores skin tone and elasticity.
- Lifts and tones sagging buttocks.
- Tightens loose skin after liposuction, cryolipolysis and pregnancy.

Reduces the signs of aging in just minutes:

- Firms and tones sagging skin, noticeably improving its texture.
- Creates a youthful complexion by increasing collagen production.
- Lifts the face and neck area and restores skin elasticity.

Tighten the buttocks without the need for exercise!

The Lipomax’s RF technology offers a highly effective butt lift treatment, allowing you to multiply your profits with one of the most popular procedures today. In just a few minutes per session, the LipoMax improves definition and firms the skin, giving your clients the body they always wanted.

♦ A complete range of face and body solutions with no pain, side effects or recovery time.

LipoMax has been designed to provide safe treatments for every skin type achieving excellent results without causing pain or discomfort, and without the risks associated to other aesthetic procedures.

Its modern accessories provide the perfect penetration of the energy for optimum results.

The LipoMax's specialized treatment heads have been designed to accommodate to the different body areas, offering comfortable, safe and highly effective treatments in any skin type.

1 small applicator with RF, vacuum and blue light:

Designed to treat the face and neck area.

1 medium applicator with RF, suction and red light :

Provides an effective arm and leg treatment.

2 large applicators with RF, vacuum and red light:

Ideal for broader areas such as buttocks, abdomen and back.

1 vacuum hose

Features:

- Modern touchscreen
High resolution, user-friendly interface
45° adjustable screen for optimal visualization
- Easy-to-use swipe touchscreen panel
- Multiplatform device
- Language selection
- Photopneumatic vVacuum hose for fast and easy connection
- Three treatment work modes:
Continuous Pulse Mode
Regular Pulse Mode
Super Pulse Mode

Technical Specifications

- Power 110V/60Hz, 220V/50Hz
- User interface 15" touchscreen
- RF Bipolar, multipolar, 1.2 MHz, Max 50W
- Max Vacuum 350 mmHg
1- 15 Hz Pulses (regular pulse, super pulse, continuous pulse)
- Phototherapy Red LED 640 nm, blue LED 430 nm
- Dimensions 44 x 44 x 112 cm
- Net weight 45 kg
